- **Weekly Viewership**
- **Channel Performance**
- **Daily Viewing Patterns**
- **Engagement Breakdown Based on Duration**
- **Viewership by age group**
- **Recommendations**
- **Thank You**

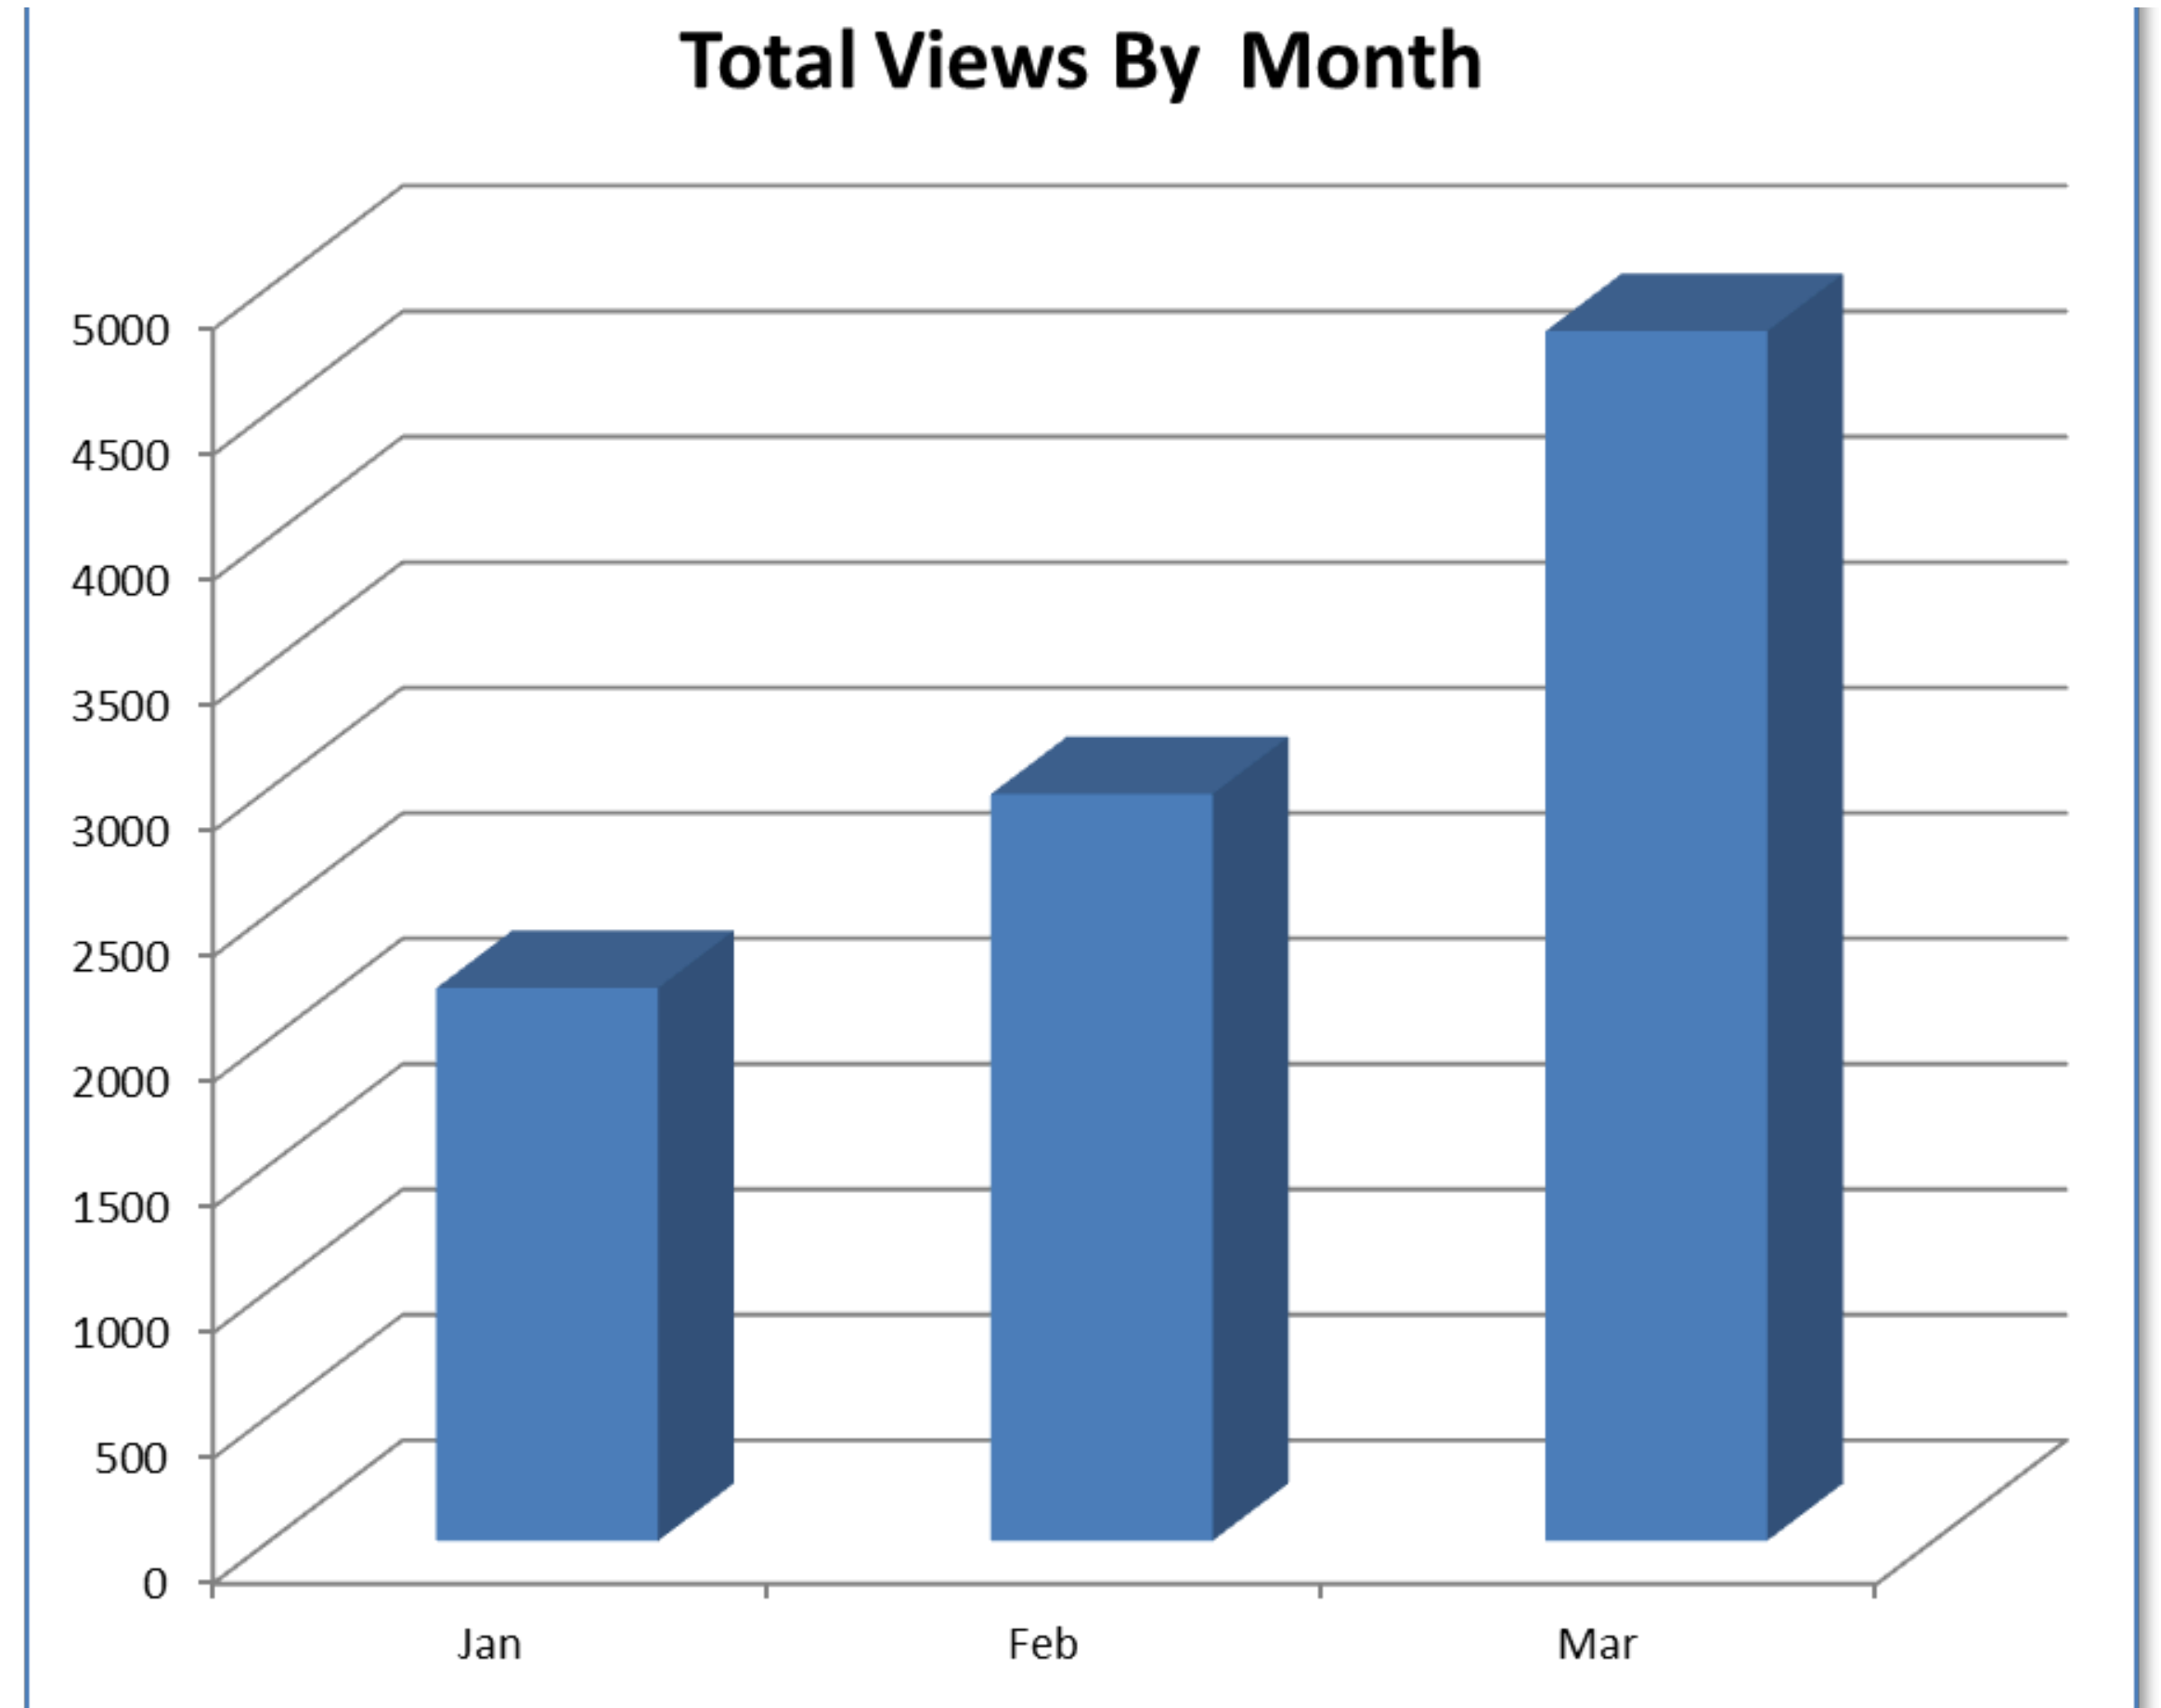

Problem Scenario

Bright TV 's CEO has an objective to grow the company's subscription base for this financial year. He has approached you to provide insights that would assist CVM (Customer Value Management) team in meeting this year's objective.

**Please prepare a 20 min presentation covering the following topics:
Provide insights on user and usage trends of Bright TV.
What type of factors influence consumption?
What content would you recommend to increase consumption on the days with low consumption?
What type of initiatives would you recommend to further grow Bright TV 's user base.**

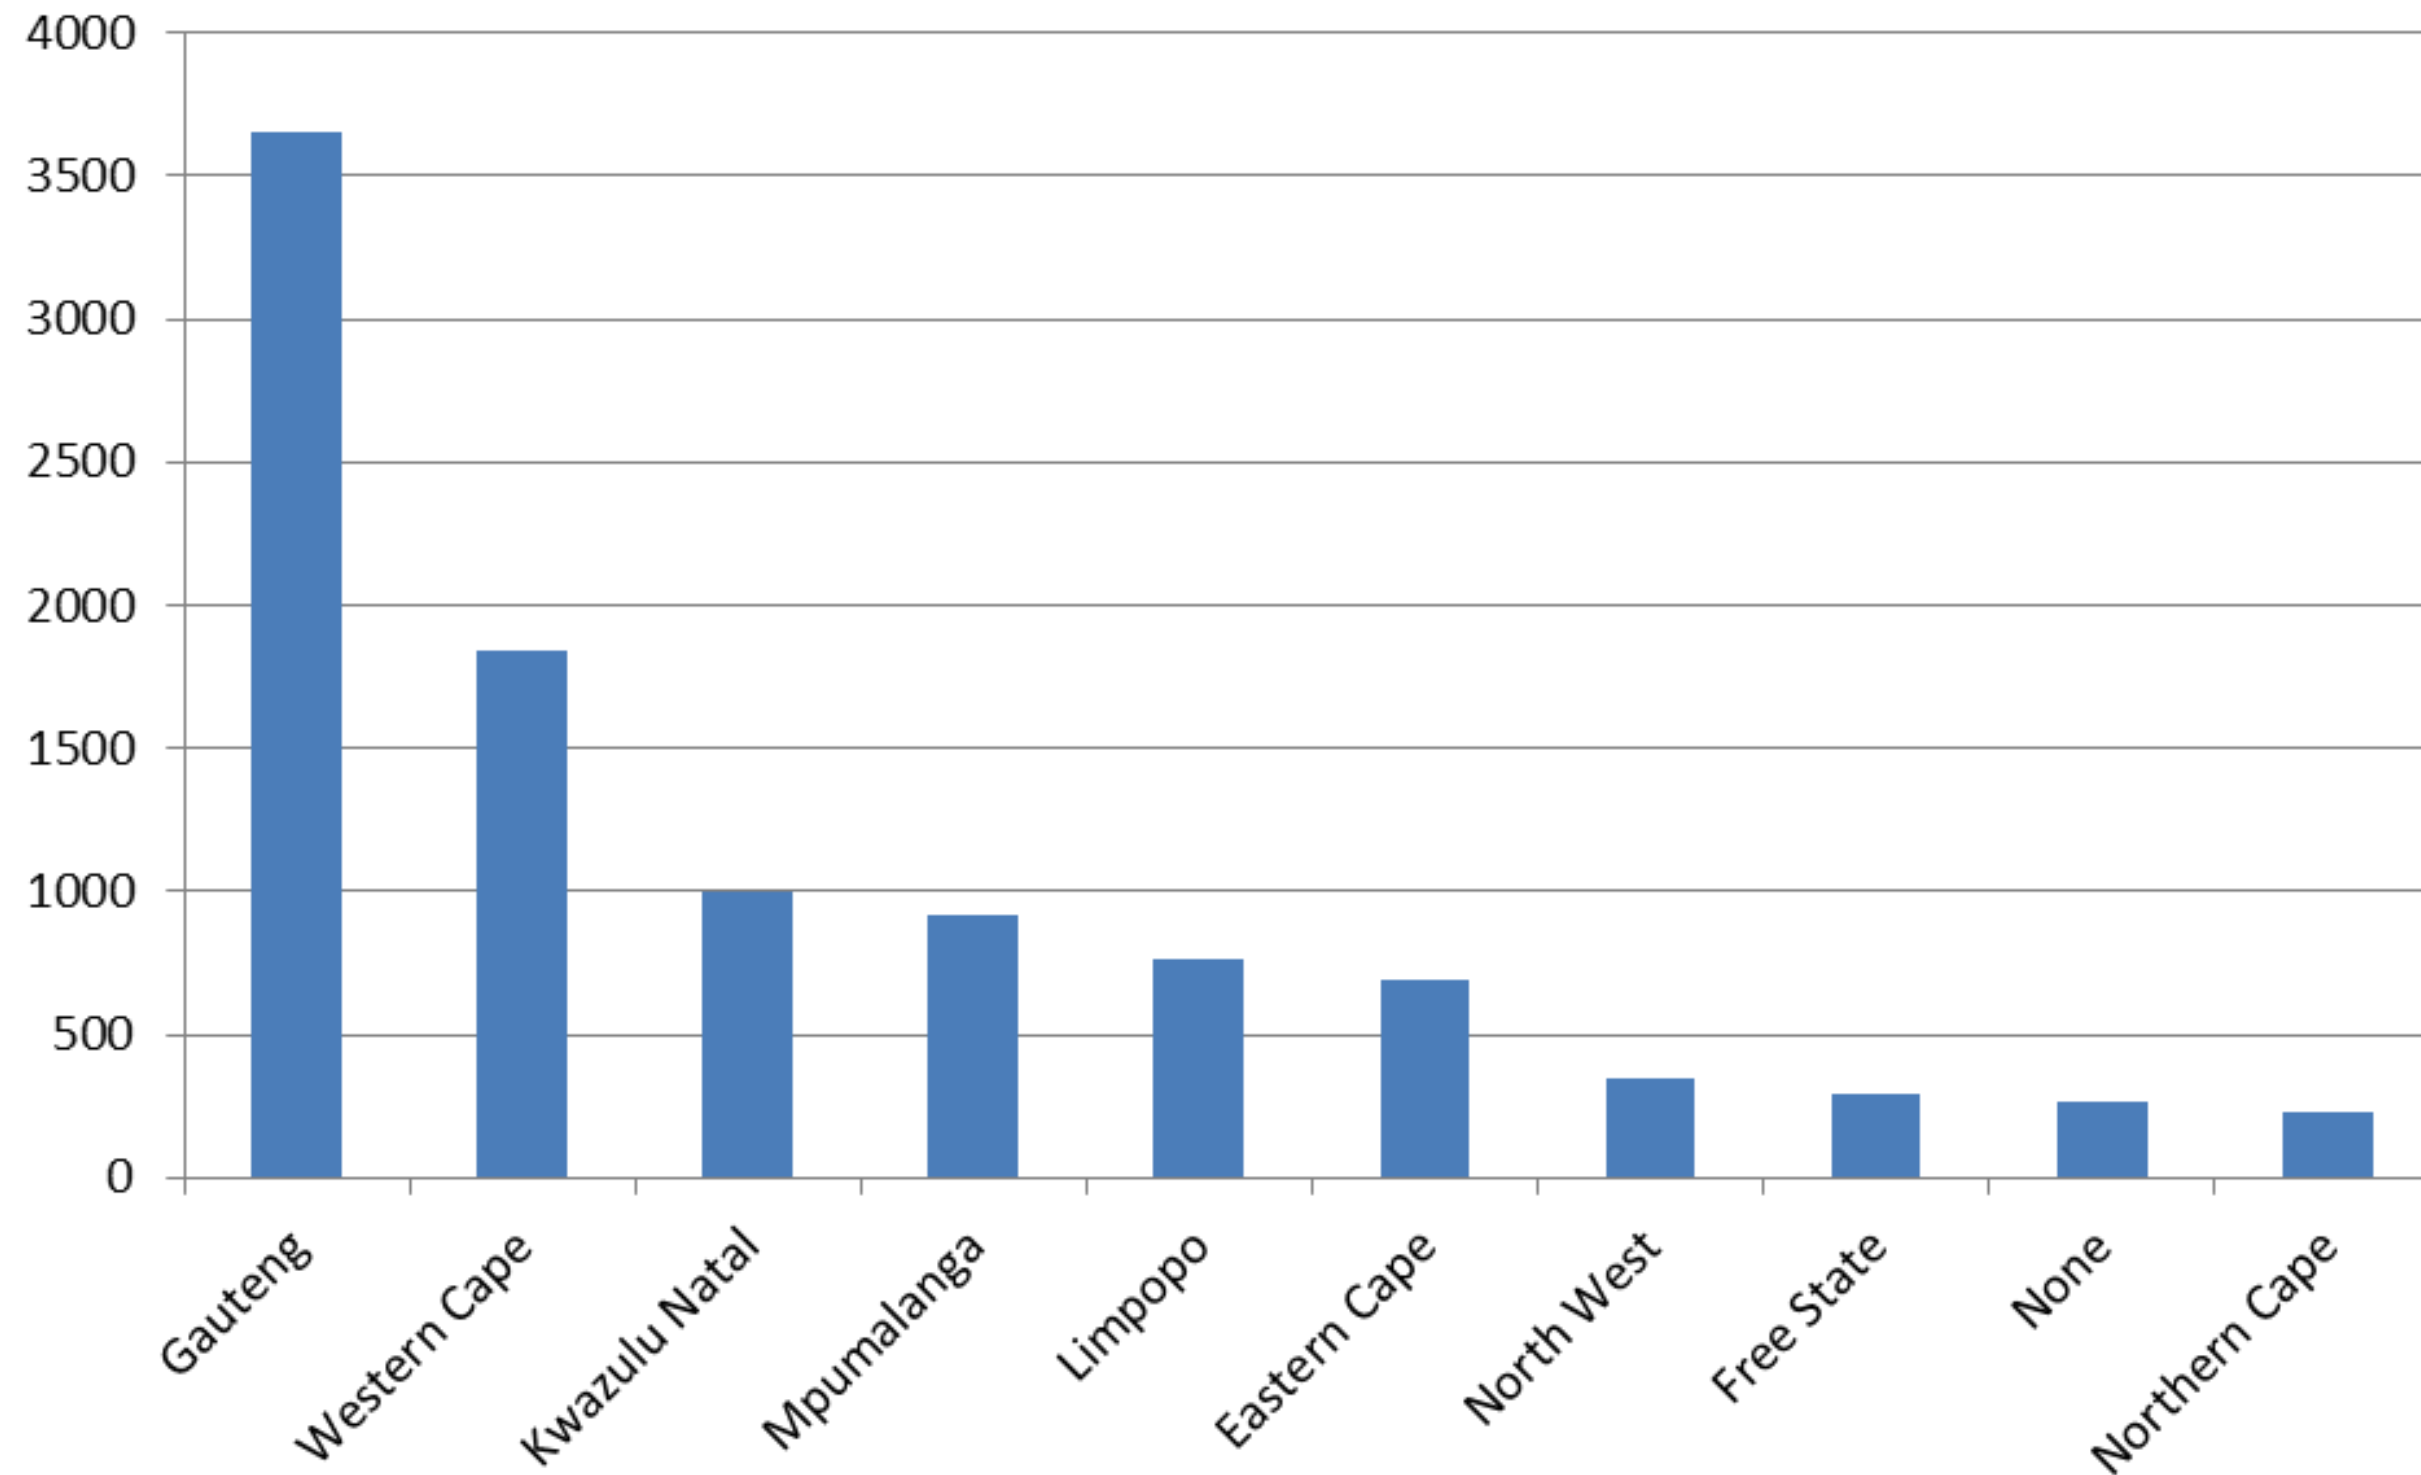

Viewership Growth Trends

Bright TV's viewership is growing on a monthly basis, with March recording the highest total views at 48% of all views in the dataset

Geographic Insights

Total Views By Province

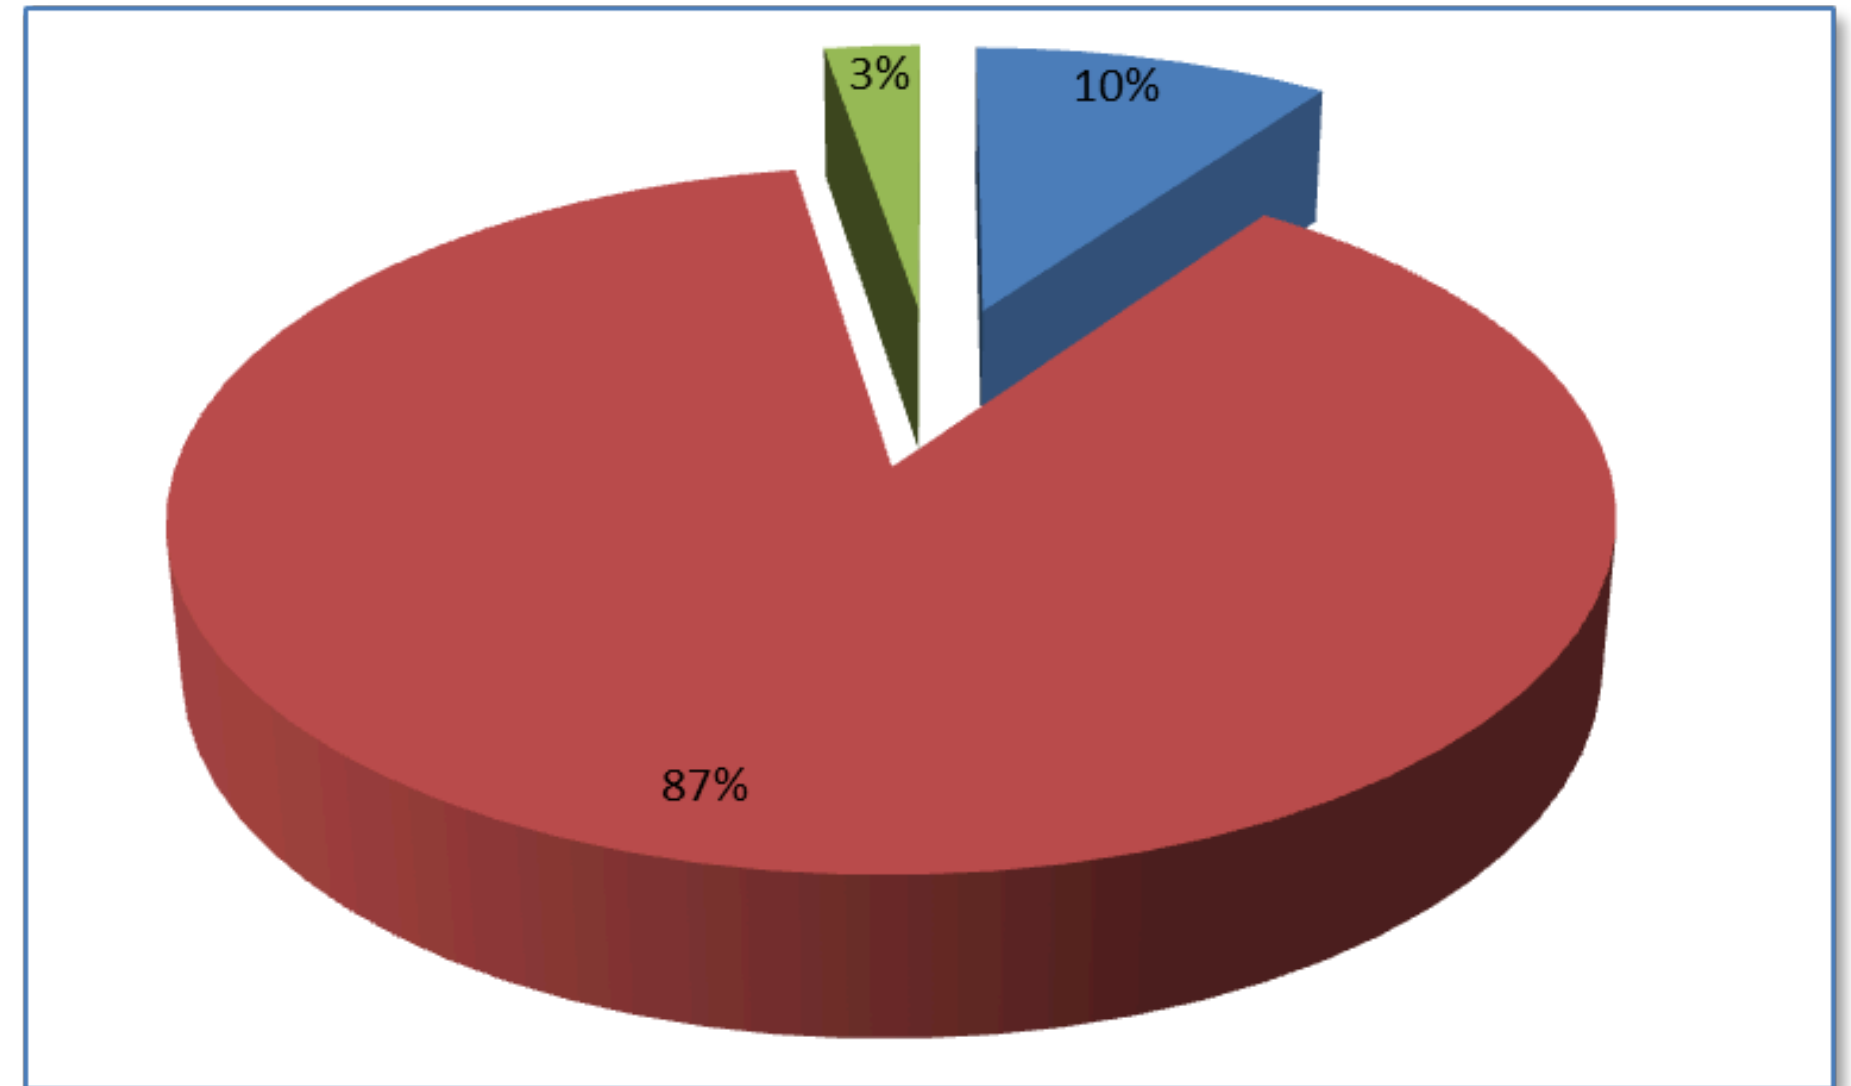

- Gauteng accounted for 36.5% of total views followed by Western Cape at 18.5%.
- This aligns with population distribution as these are SA's two most popular provinces. High population = Higher usage

Audience Demographics

- Male viewership dominates across all time slots and sums up to 88%
- Female engagement remains consistently low and only contributes 10%
- 3% of viewers did not disclose gender

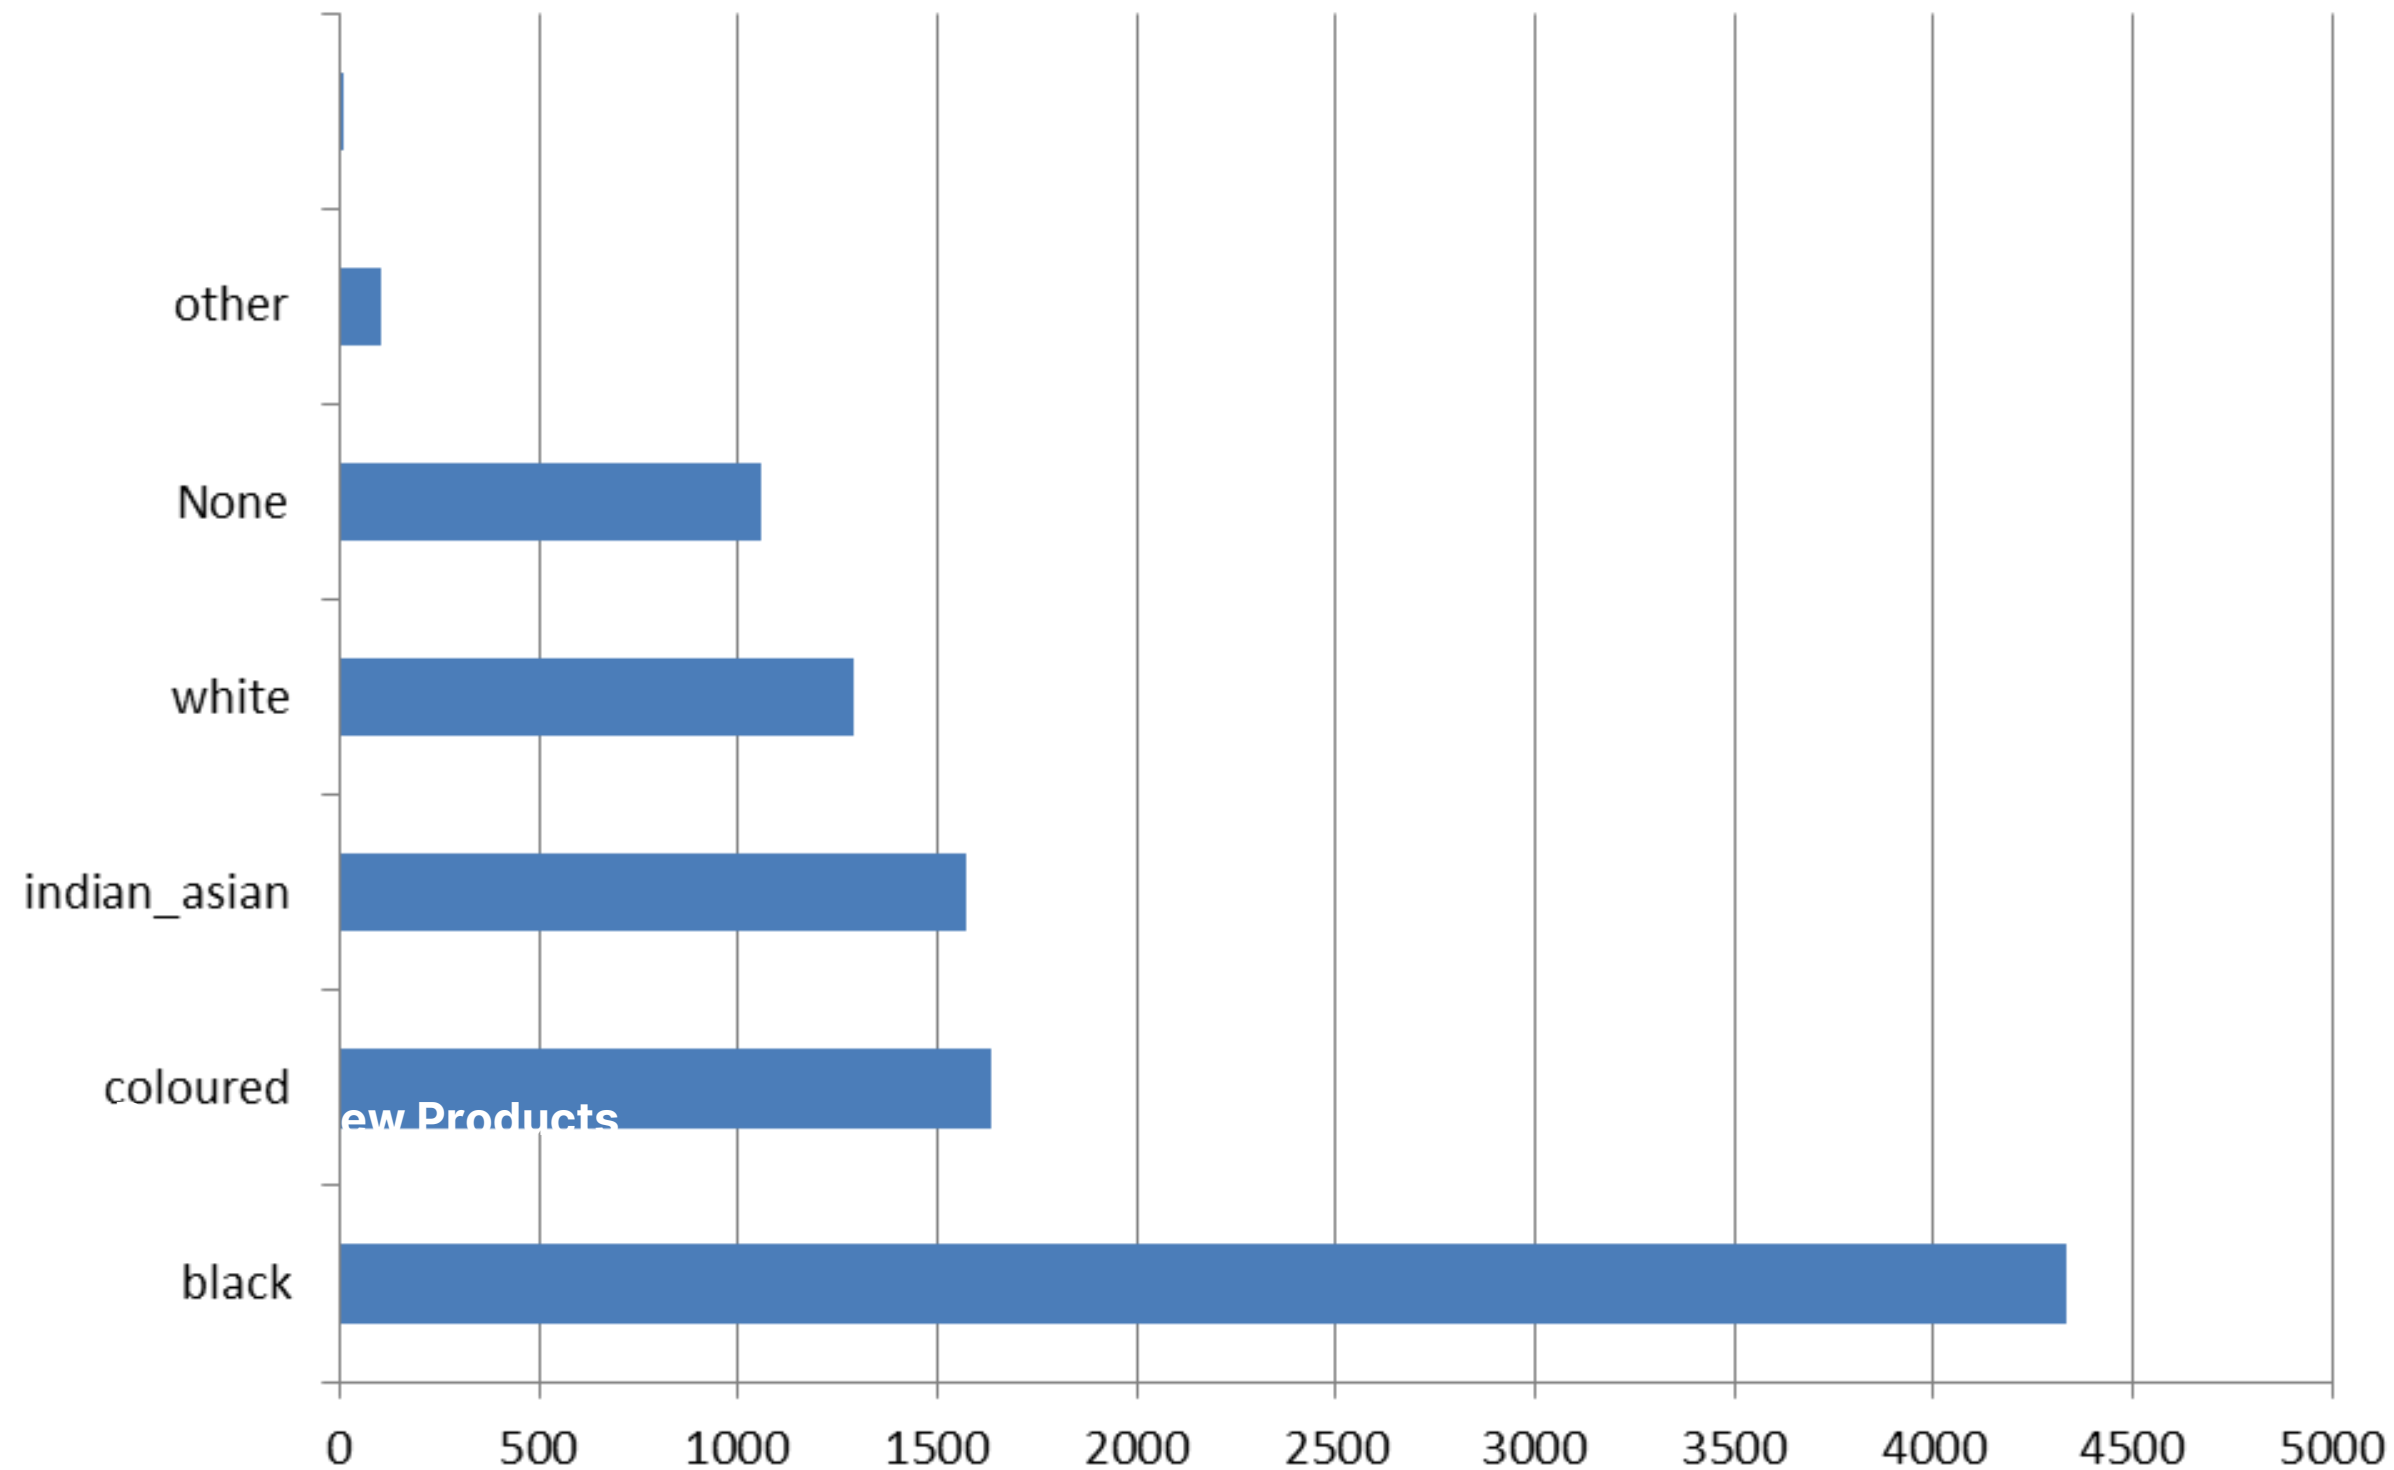

Total Views By Gender

■ female ■ male ■ None

Viewership by Race

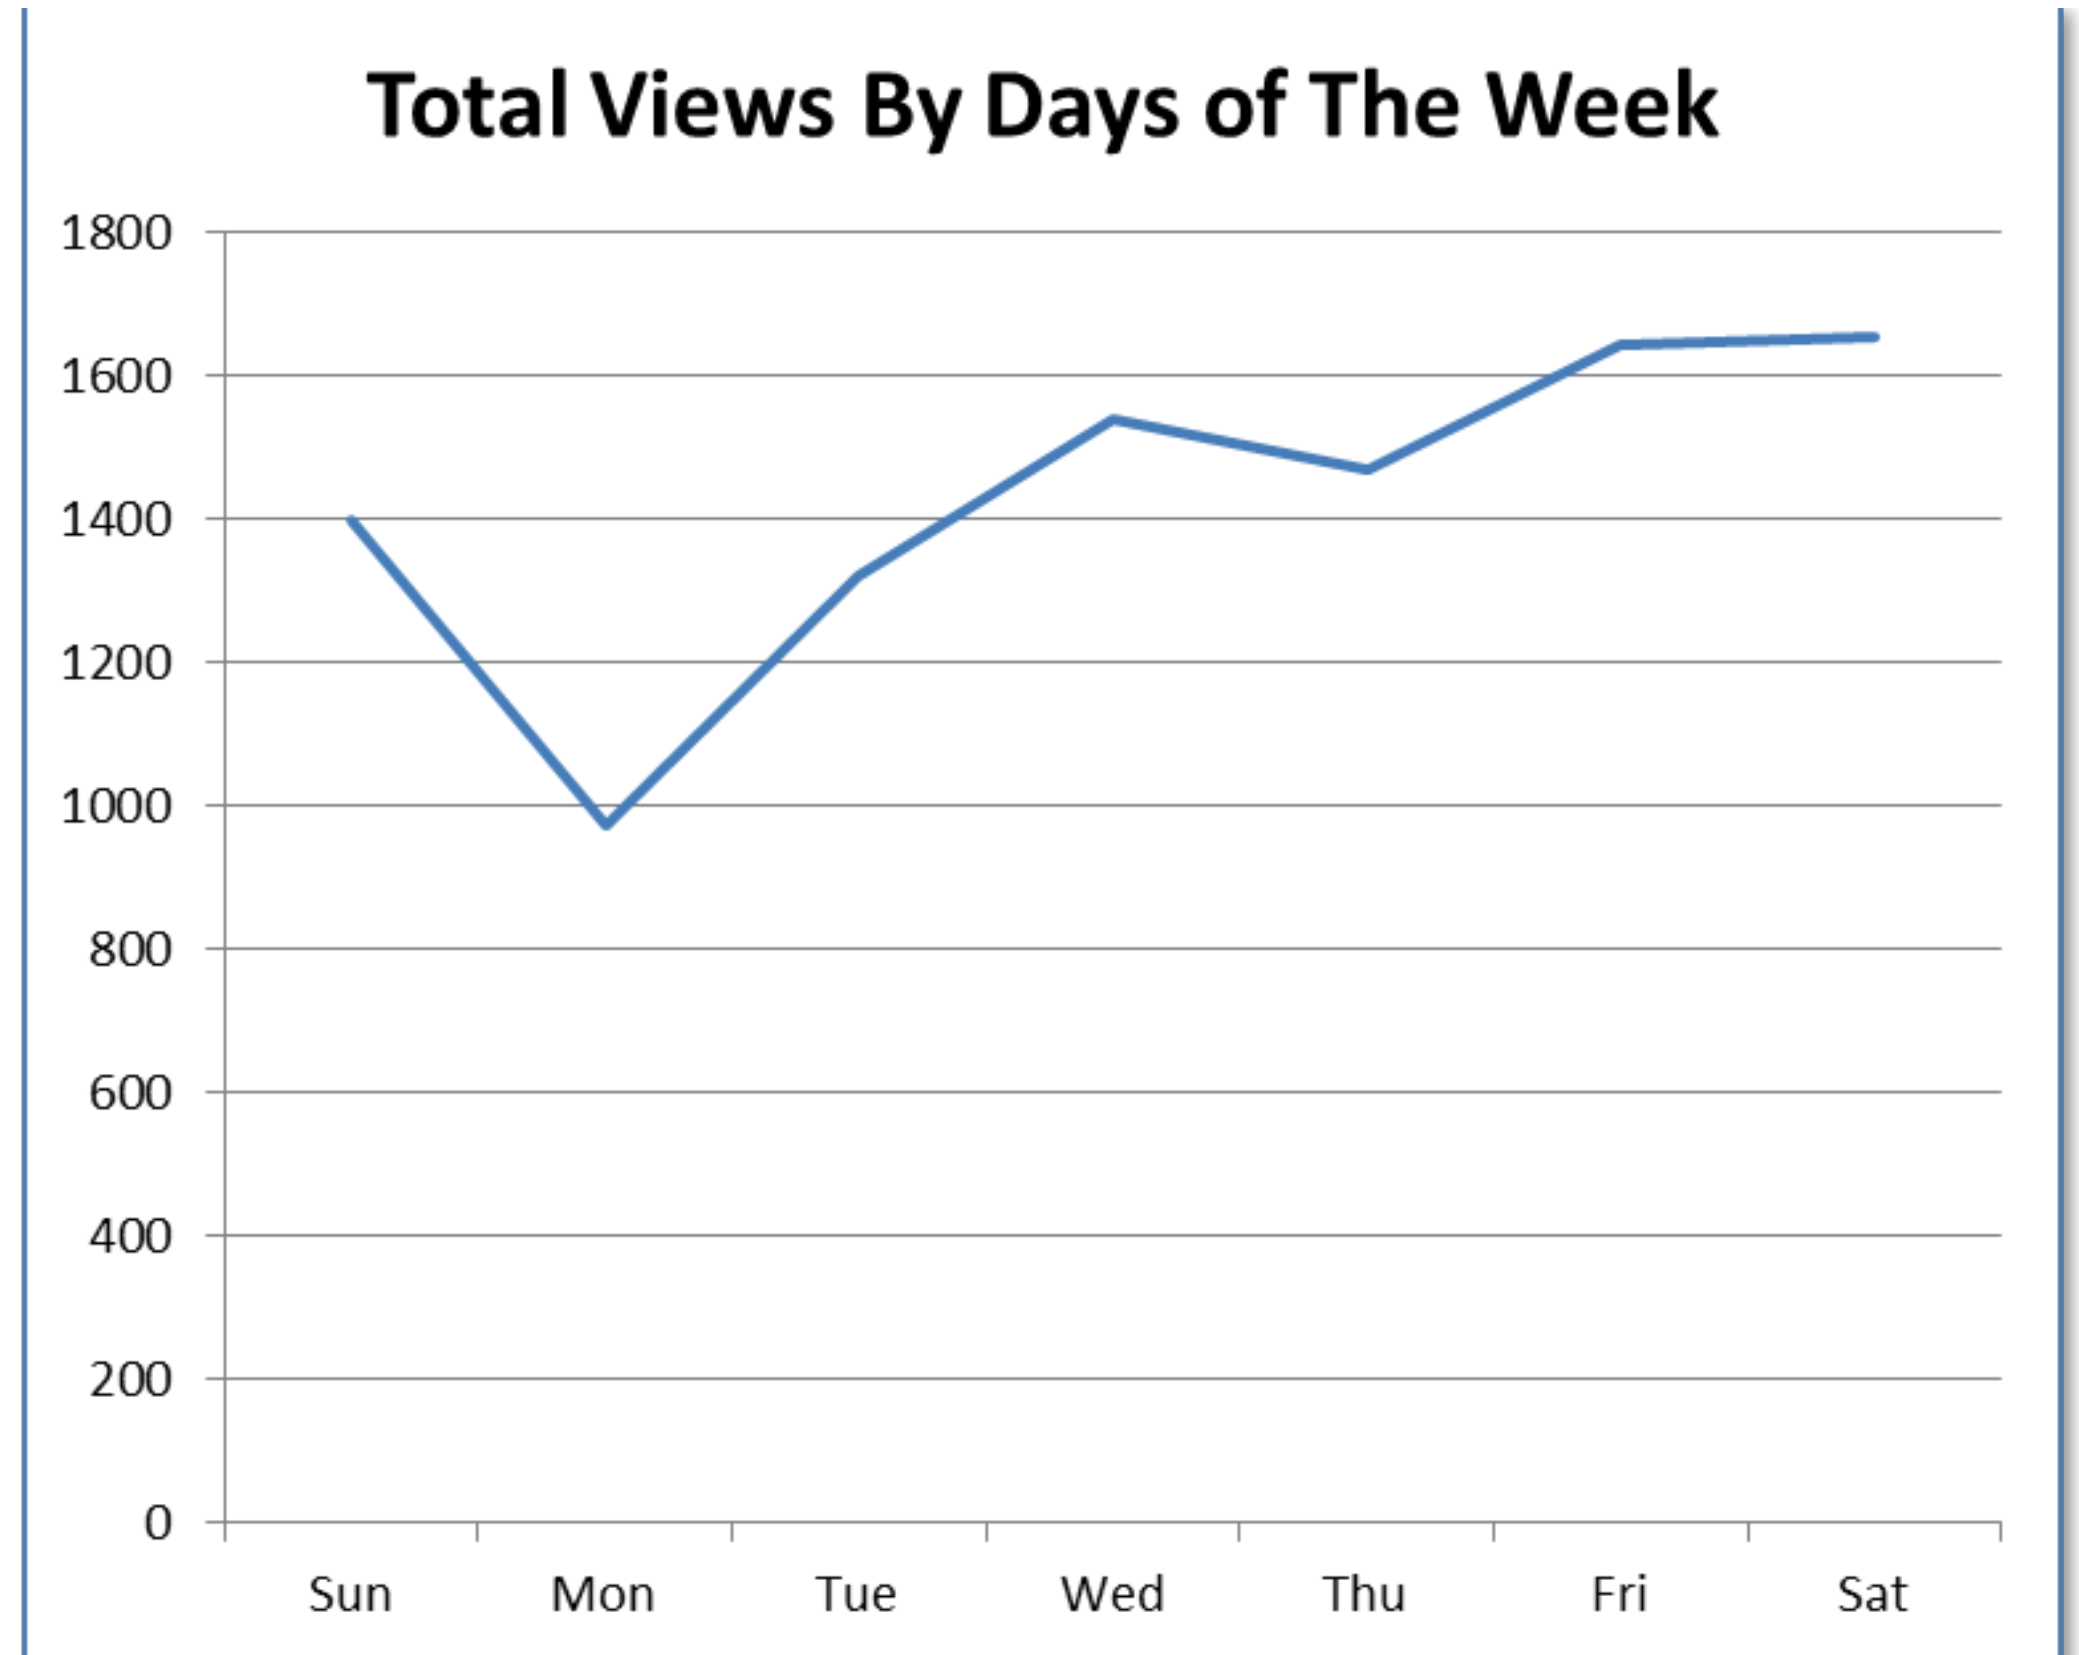

Total Views By Race

- Black people made up the largest share of Bright TV's audience at 43%
- There is a significant viewership from Coloured, Indian/Asian as well as White audiences
- This shows that Bright TV has a diverse base but Black viewers remain the primary audience

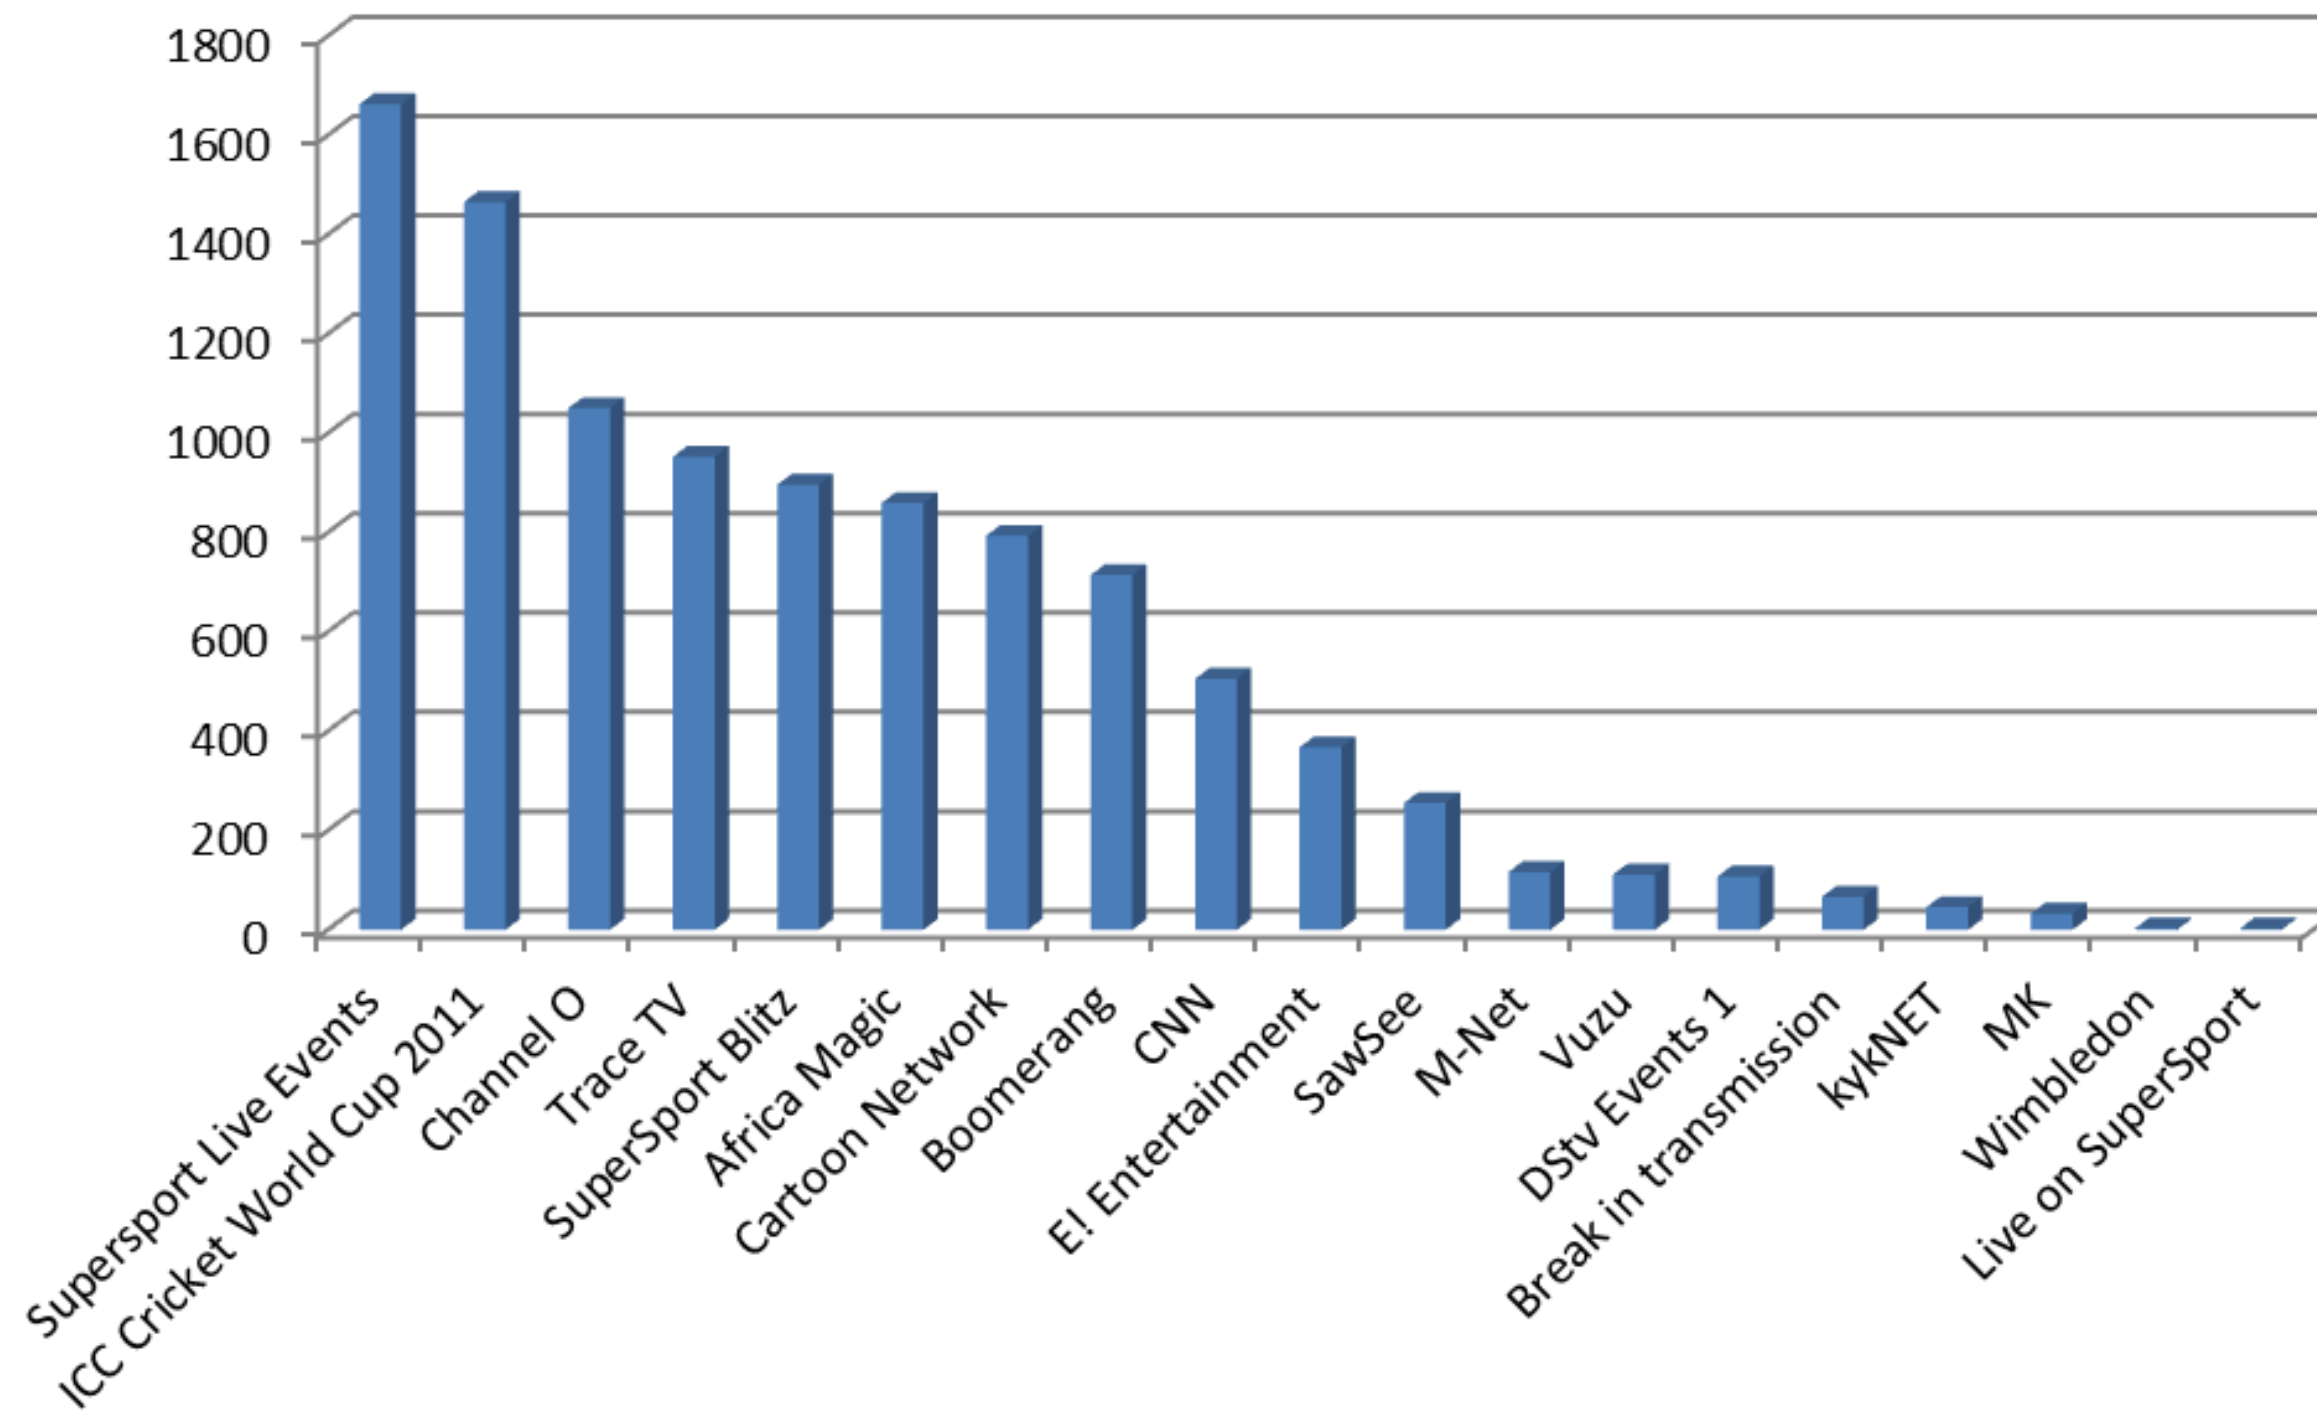

Weekly Viewership

- Views are lowest on Monday and peak midweek on Wednesday
- Weekdays make up to 70% of total views as compared to 30% on weekends

Channel Performance

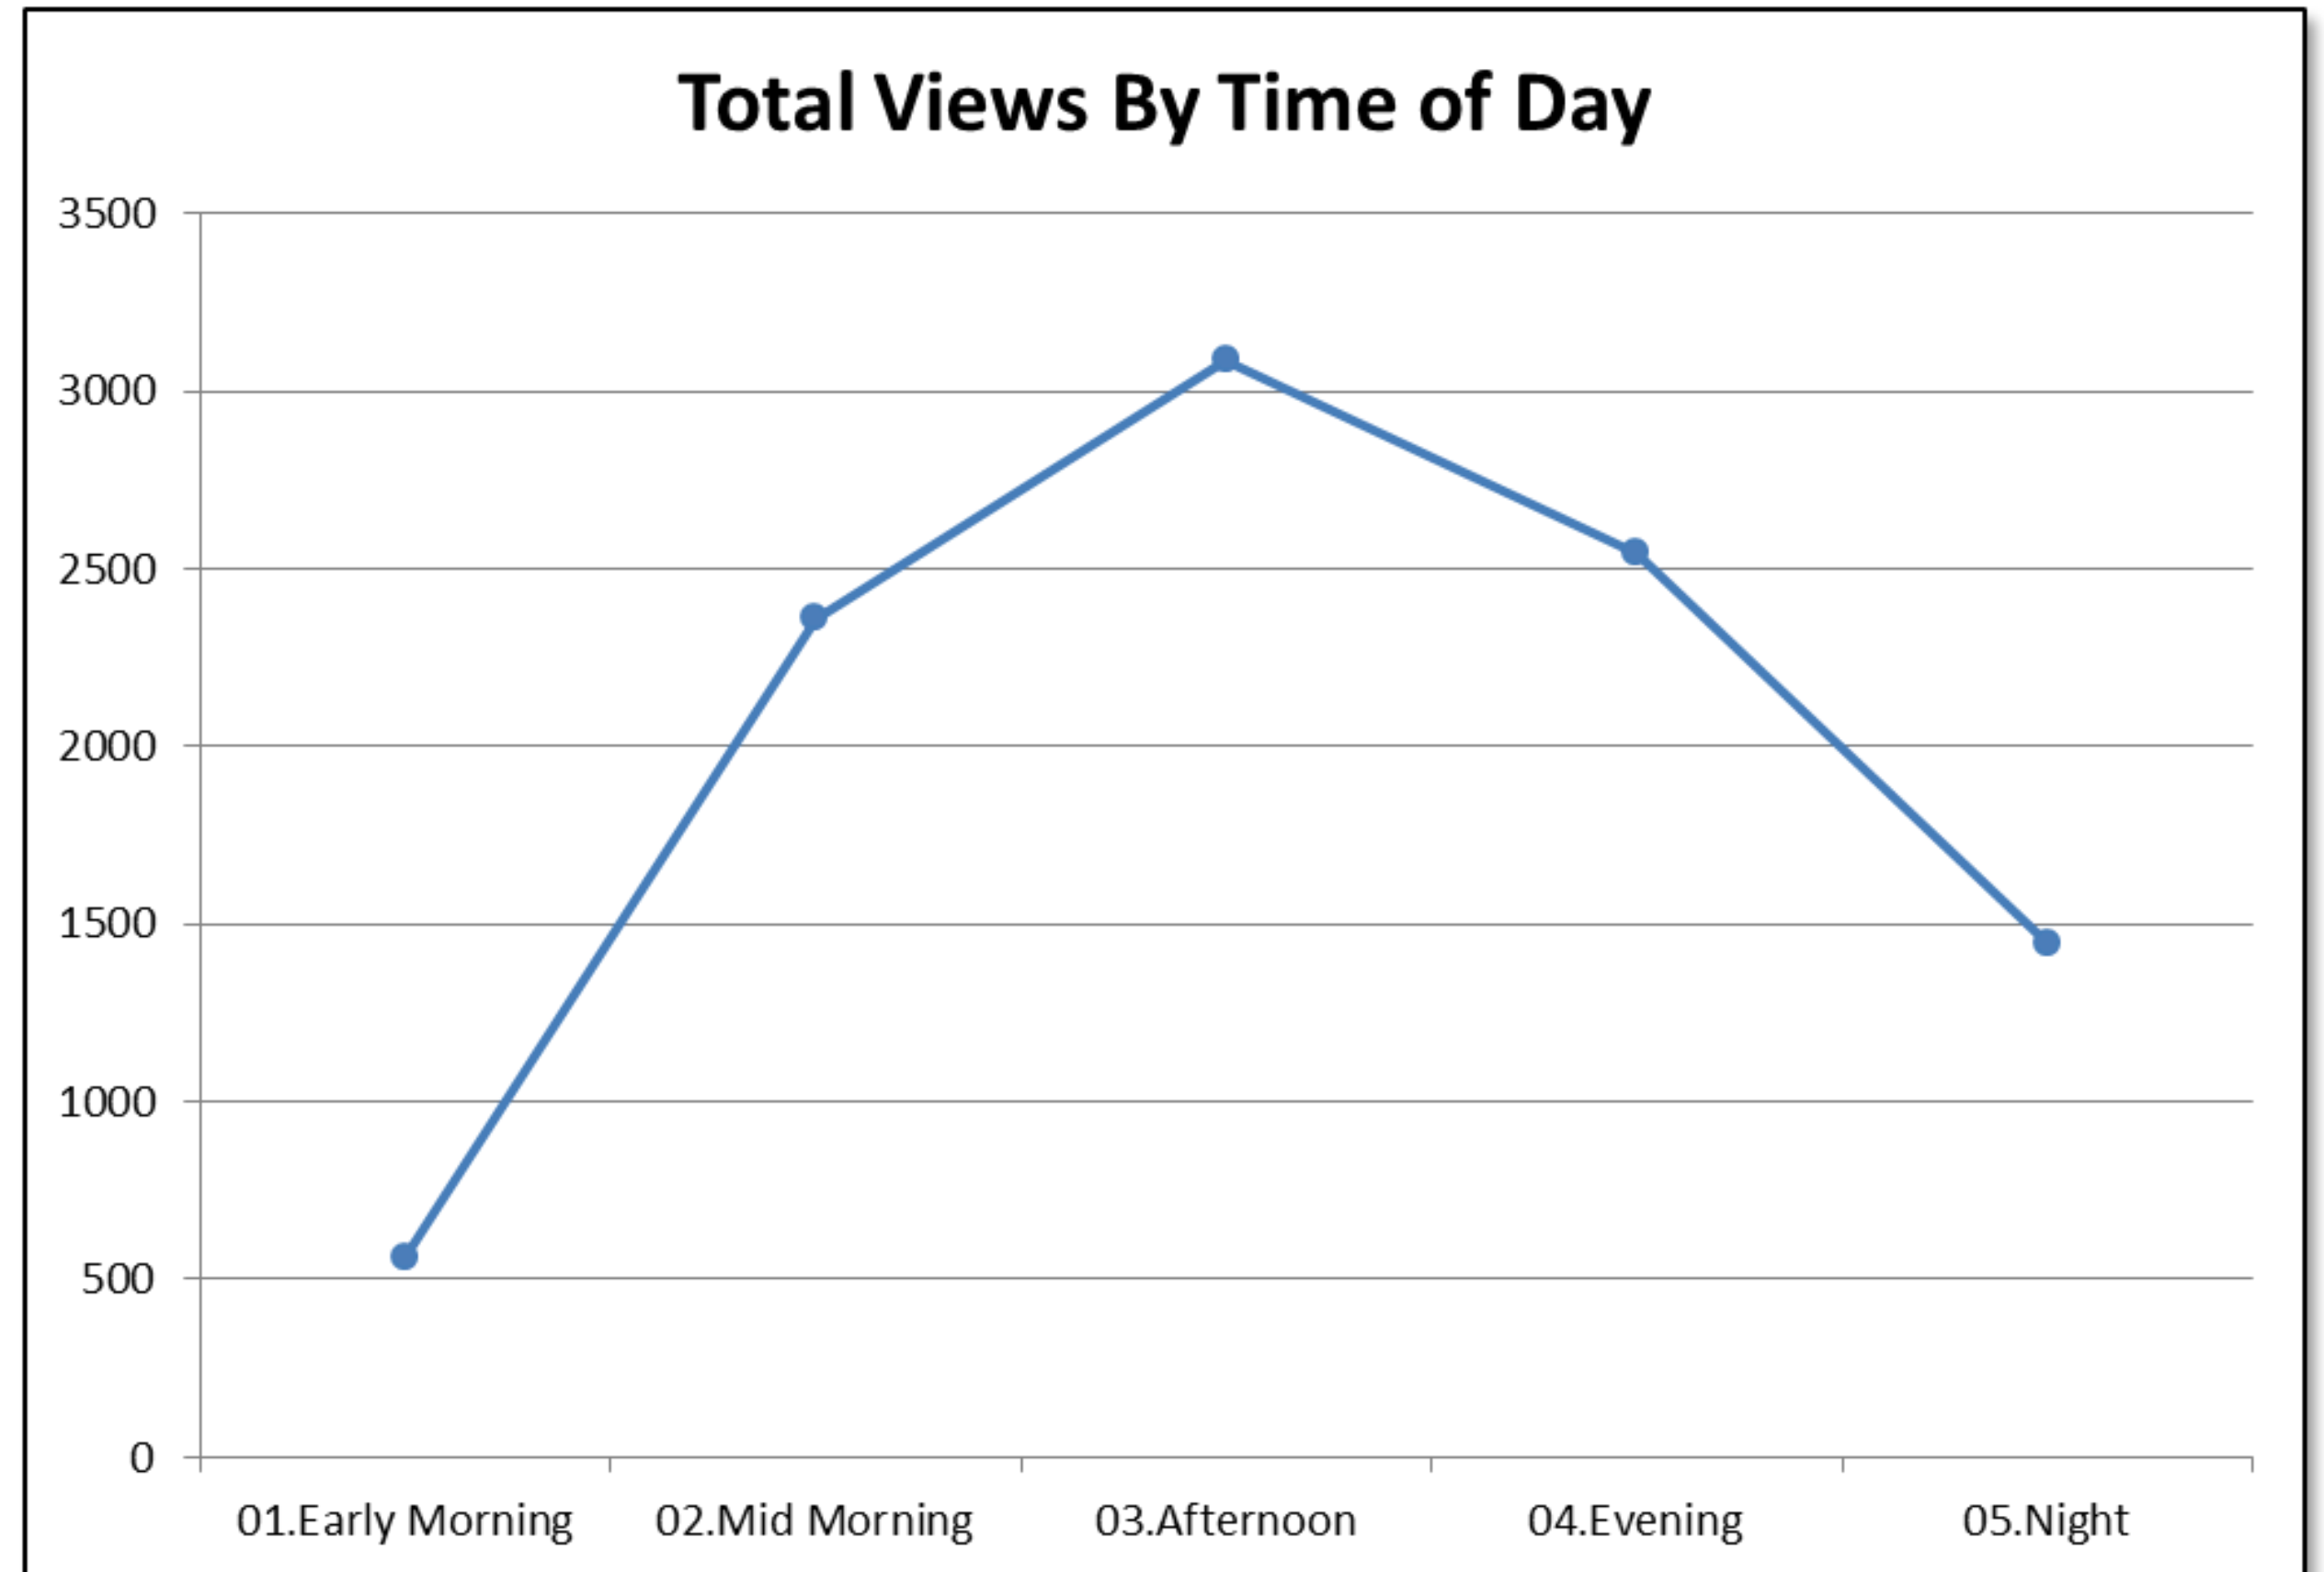

Total Views By Channel

- supersport Live Events & ICC Cricket World Cup have the highest views, outperforming all other channels
- Entertainment, news, music and kids channels shows a steep drop of views

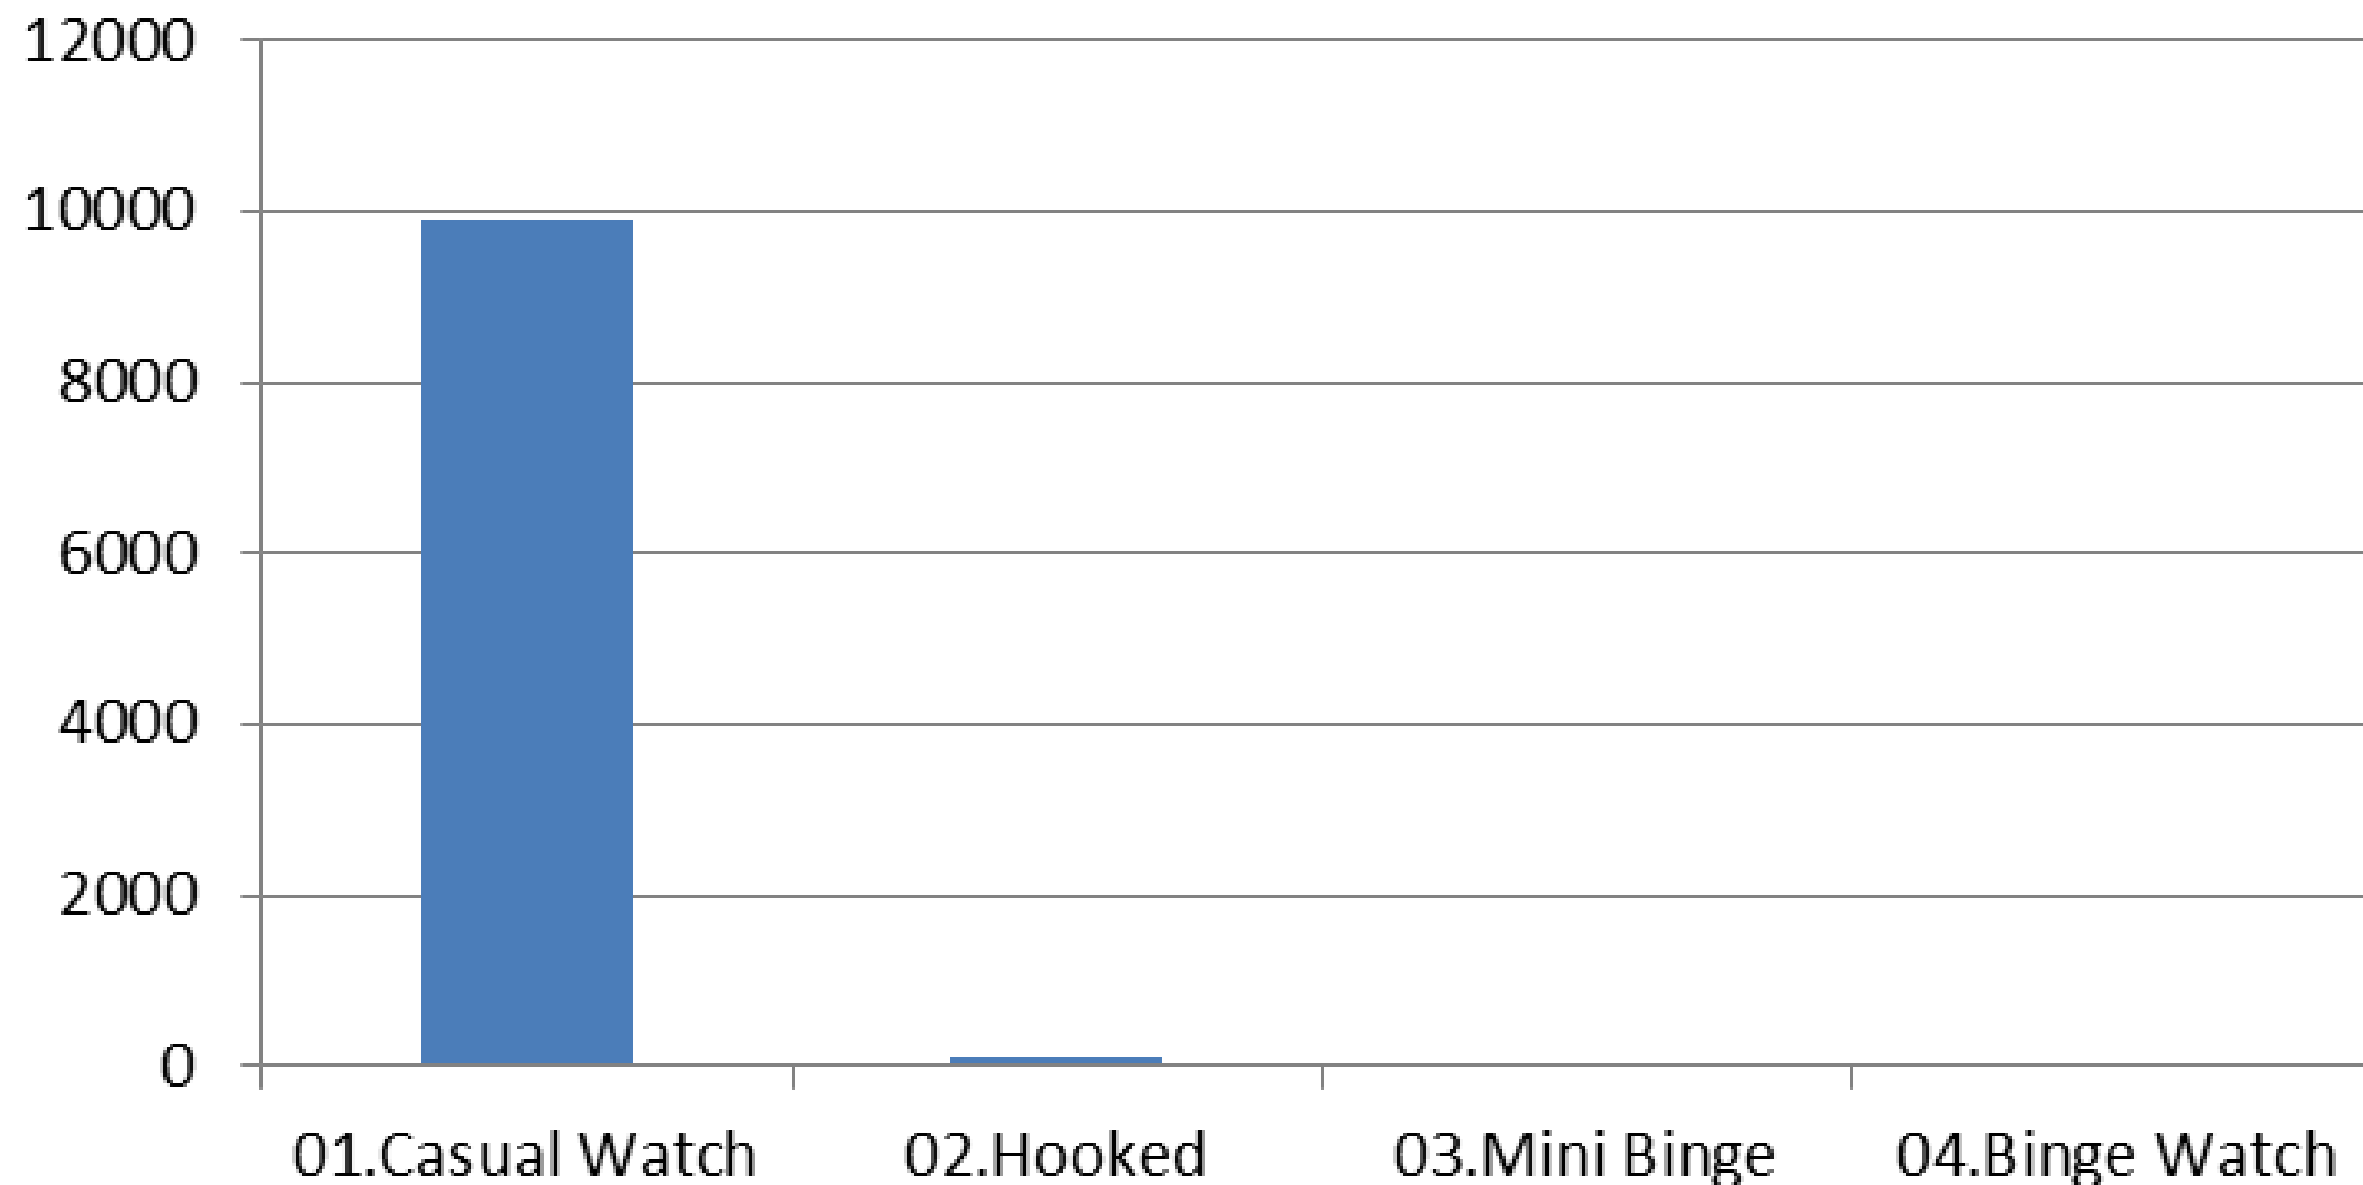

Daily Viewing Patterns

- Afternoon is peak viewing time, followed by evening and mid morning catchup with the two
- Lowest engagement is seen early morning and at night
- Overall viewership builds from early morning, peaks midday then drops at night

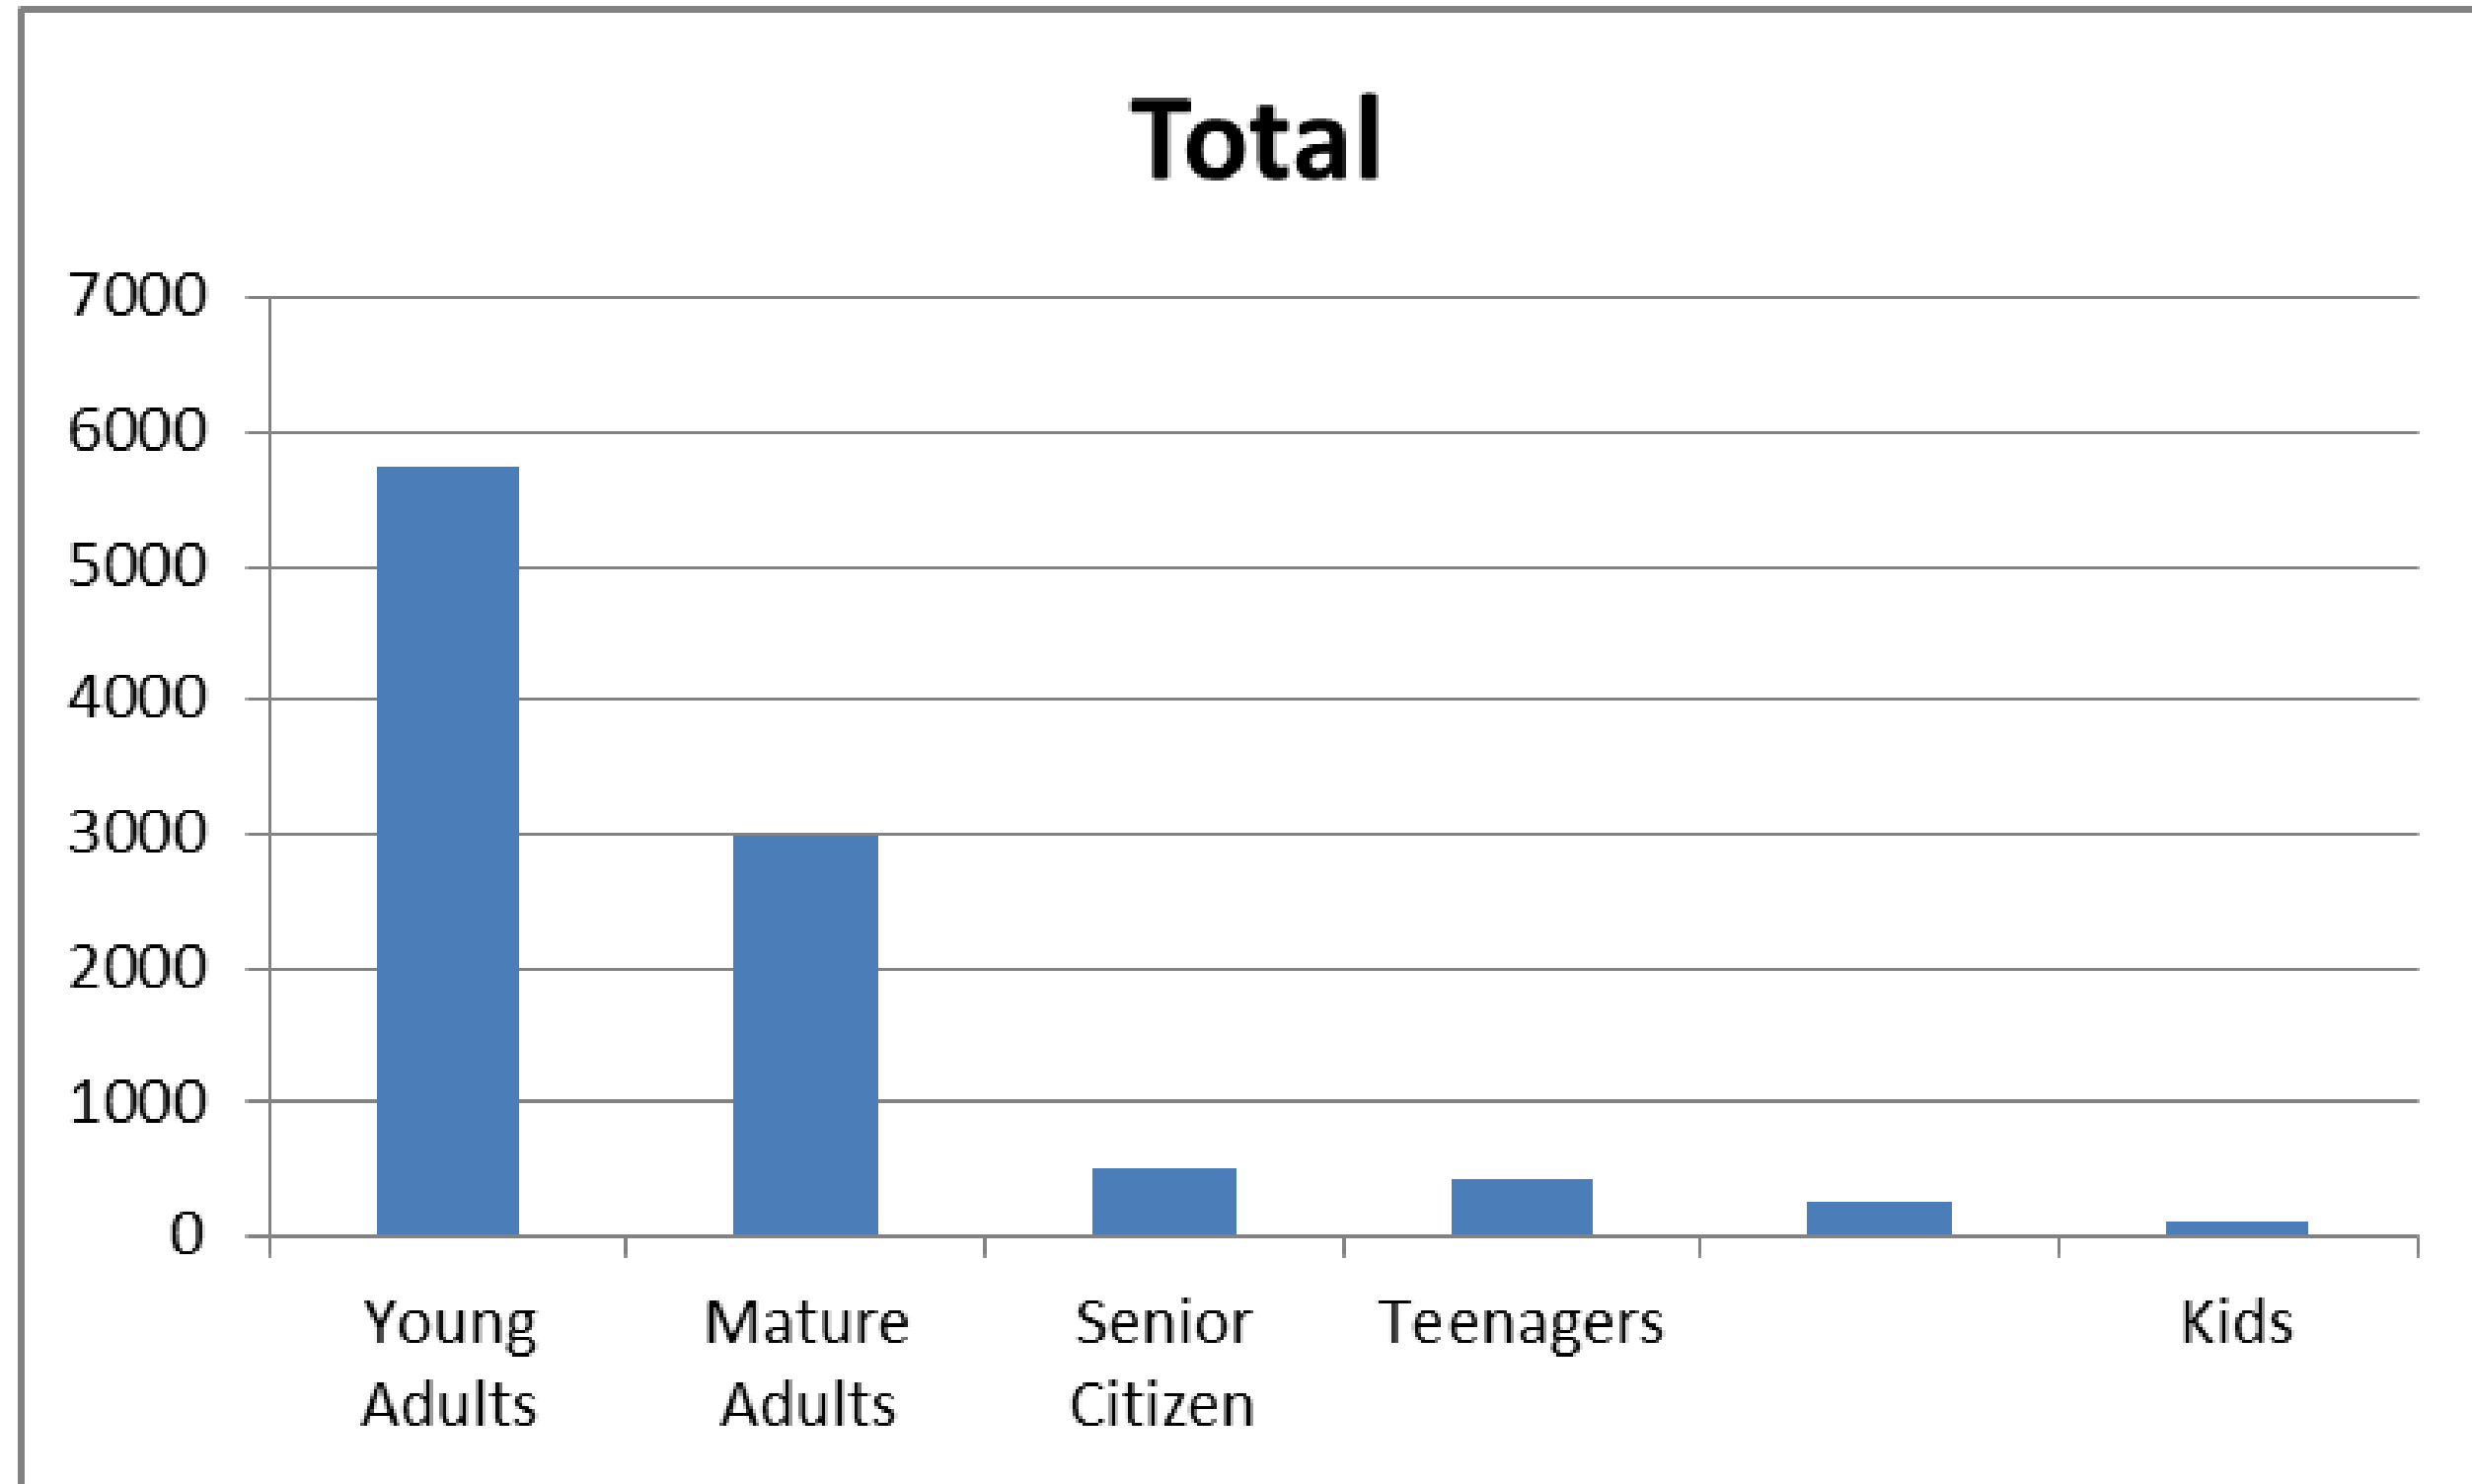

Engagement Breakdown Based on Duration

Engagement Breakdown

- 99% of viewers are casual viewers who disengage quickly
- only 95 views show "Hooked" behaviour
- This slide shows that session length does influence consumption

Viewership by Age group

Young Adults are our biggest group of viewers and kids are showing the least views

Recommendations

- **Introduce live sports or sports highlights content on Mondays to boost engagement ...**
- **Convert casual watchers to hooked viewers**
- **Personalised recommendations + local language content for lower performing provinces**
- **Launch female focused content in the afternoon peak slot**
- **Implement content that is fun and educational for kids (toddlers and kids below 12) to keep them glued to screens after school**
